

Multispeech 4

The Multispeech is a four-channel speech enunciator module designed for intruder monitoring, access control, welcoming, advising or warning. A different 30 second message can be recorded on each of the four channels or alternatively one single message of 120 seconds long can be recorded.

Configurable to accept any normally open or normally closed input, this gives greater flexibility when using any detection device, alarm panel, panic button, telephone responder or activation from a Remote Video CCTV Monitoring Station. The Multispeech provides an 8 ohm audio output that can be applied to a loudspeaker or to a dialler that has a speech processor input. Recording can be made using the on board microphone or alternatively by a TV p-p line input.

One single message of 120 seconds or four individual messages of 30 seconds
EEPROM, non-volatile memory
Four individual normally open or normally closed triggers
Pulse count selectable (1 to 3)
Optional preceding message alert
Re-trigger period between 1 and 30 seconds
Linking message outputs

PRODUCT CODES

GJD090 Multispeech 4

FEATURES

- 8 ohm audio output
- EEPROM non-volatile memory
- Pulse count selectable
- Linking message outputs
- 2 speaker output

BENEFITS

- Perfect to deter intruders
- Flexible and can be used with an detection device
- Easy to install
- Quick to record messages

ACCESSORIES

GJD191 Hornspeaker
