ADI READING - OPEN DAY

Outdoor Perimeter Protection

GJD's external motion detectors and LED illuminators identify genuine threats and create alerts when an intruder is at the boundary, rather than inside the premises.

Add GJD products to your next project to provide your customer with an effective first line of defence.

Greg Stuttle, GJD's Business Development Manager will be at the branch on Thursday 8th September offering live product demonstrations for customers and ADI staff.

We will be giving away a D-TECT 3 Quad PIR & Microwave outdoor motion detector.

Refreshments will be available throughout the day.

Pre-book a one-to-one appointment with **Greg Stuttle**, GJD's Business Development Manager.
